Comment from Micheal Kavanagh, Lispole, Co. Kerry (17 February 2021): 44% of cows calved. 11% of ground is grazed. Cows are getting out by day and for a few hours after the evening milking. Mild temperatures allowed 75% of the farm to get 35 units of urea per acre on February 8th and the remaining 25% got 3000 gallons of slurry per acre.
