

Demonstration Farmer Update from Gerry & Niall Moloney 25 Feb 2022

Cows calved: 65%

Percentage grazed: 12%

Farm cover: 1069 kg DM/ ha

Winter growth: 6 kg DM/ ha

Cows on-off grazing

Cow supplementation: 4 kgs indoors

3 kg at grass

Current Management

- **2500 gallons of watery slurry spread by LESS or 20 units of protected urea on 75% of milking block in late January**
- **Protected urea as the source for N fertilizer**
- **Targeting getting slurry on silage ground next week**
- **Will be spraying off ground for reseeding in mid to late March**
- **Will be incorporating red clover into reseeding**
