

On-Farm Research - How do you think we did?

Statistics

What did we do well?

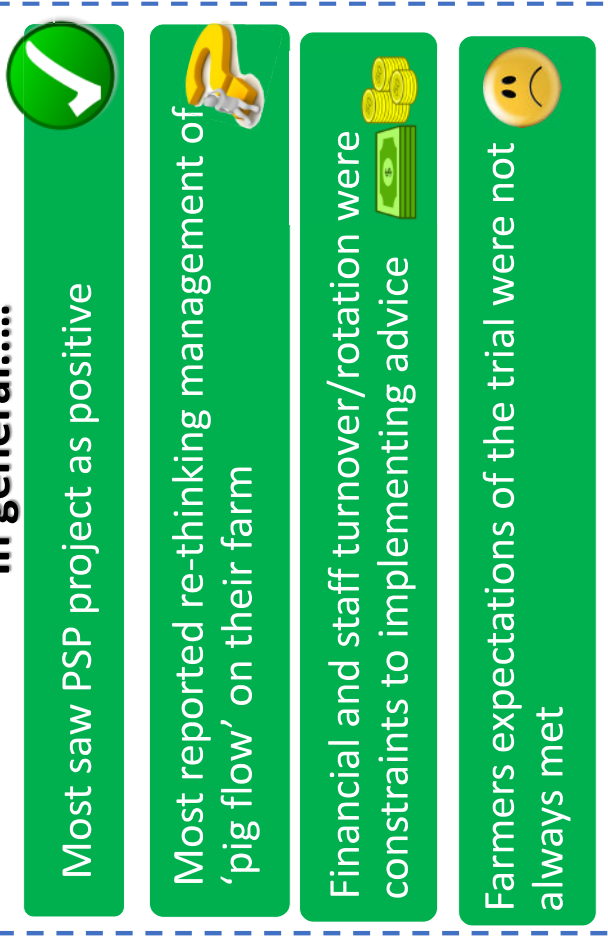

Encouraged 'Best Practice'

Worked hard and independently

Built relationships

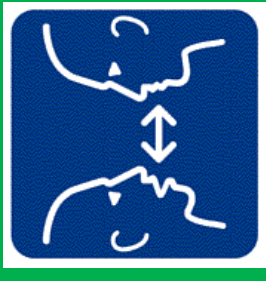

In general.....

How can we do better? Improve communication!

- Goals of the research
- Relevance of research to your business
- Research process and timelines for completion (e.g. diagnostic tests)
- Role of individuals within the research team

"I completely changed my breeding policy...and my hospital unit and euthanasia.....And then pig flow, completely changed it, that was very valuable"

"the challenges the pigs have that I didn't think were as bad and stuff that I thought was bad maybe not as bad."

"They came and went and did their own thing. I didn't have to be babysitting them or staying with them."

"Basically that we weren't doing the job [e.g. weighing and grading pigs] as we should have been done [sic] and we learnt a good bit from it"
