

- Four grazing herds – 2.75 cows/ha, 250 kg N/ha
 - Tetraploid only (TO) and tetraploid + clover (TC)
 - Diploid only (DO) and diploid + clover (DC)

Ploidy did not affect grass or milk production

- ### Take home messages
- Grass clover swards:
 - Increase grass production by 1.5 t DM/ha
 - Increase milk solids yield by 160 kg/ha
