

'Capri' Ever Bearer Strawberry Production trial

- 'Capri' everbearing (long day) cultivar
- Everbearer...Very complicated plant!
- Mazzoni-CIV-Salvi Vivai Italian breeding group
- Will produce fruit from approx. June-September
- Flushes....peaks and troughs

This experiment

- Crop is grown in coarse peat
- Medium mini tray plants
- Planted April 2018
- Given proper 'Capri' feed recommendation

First observations

- Plant doesn't like cold!!
- Don't feed with EC greater than 1.5
- Less NO₃-N and no NH₄-N.
- Less susceptible to mildew
- Fruit is firm/good shelf life
