

The logo for Haygrove, featuring the word "Haygrove" in a serif font with a green arch over the "y" and "g". The logo is enclosed in a white rectangular box with a dark green border.

Haygrove

A close-up photograph of two ripe raspberries on a green stem with thorns. The raspberries are bright red and have a textured, bumpy surface. The background is a soft-focus green.

Irish Berry  
Seminar  
2014

Haygrove –  
Past, Present  
and Future

- Started growing strawberries on 1-acres in 1988
- Haygrove Tunnels started in 1996 in response to our own farming need for rain protection

Haygrove Farming

- 262ha tunnel production
- Strawberries, raspberries, cherries, blackberries and blueberries

Haygrove Tunnels

- Built Tunnels in 50 countries
- 5 factories
- Dedicated team of design engineers

Haygrove Development

- Non-profit making
- Aim to alleviate poverty through horticulture

# Haygrove Growing UK

Crops: Cherries, Strawberries,  
Raspberries, Blackberries,  
Blueberries

# Crops Grown - Raspberries

- Raspberries -153 hectares
- Main Variety – Maravilla
- Substrate, soil grown & organic

# Crops Grown - Strawberries

- Strawberries -59 hectares
- Main Varieties – Elsanta, Jubilee, Lusa, Amesti
- Substrate, soil grown & organic

# Crops Grown - Cherries

- Cherries -27 hectares
- Main Varieties – Kordia, Regina, Karina, Sweetheart, Lapins
- Soil grown & organic

# Haygrove Growing SA

Farms: Hermanus, George

## Different hoop profiles

- Bigger air volume
- Better picker access
- Easier for spraying

# Steel Choice

## *Cost vs Benefit*

<b>35 x 1.5mm Standard</b>	<b>100 %</b>
<b>40 x 1.5mm Standard</b>	<b>132 %</b>
<b>40 x 1.5mm Extra Strong</b>	<b>165 %</b>
<b>40 x 2mm Extra Strong</b>	<b>213 %</b>
<b>40 x 2.5mm Extra Strong</b>	<b>256 %</b>

Based on Maximum Bending Moments, (kgm)

# Retrofit Pathway

Haygrove

Rain cover

+ Steel gutters

+ Electric ends & sides

+ Electric roof vent

+ Integrated climate controls

Field-scale Tunnel

Field-scale Glasshouse

# Retrofit pathway: *steel gutters*

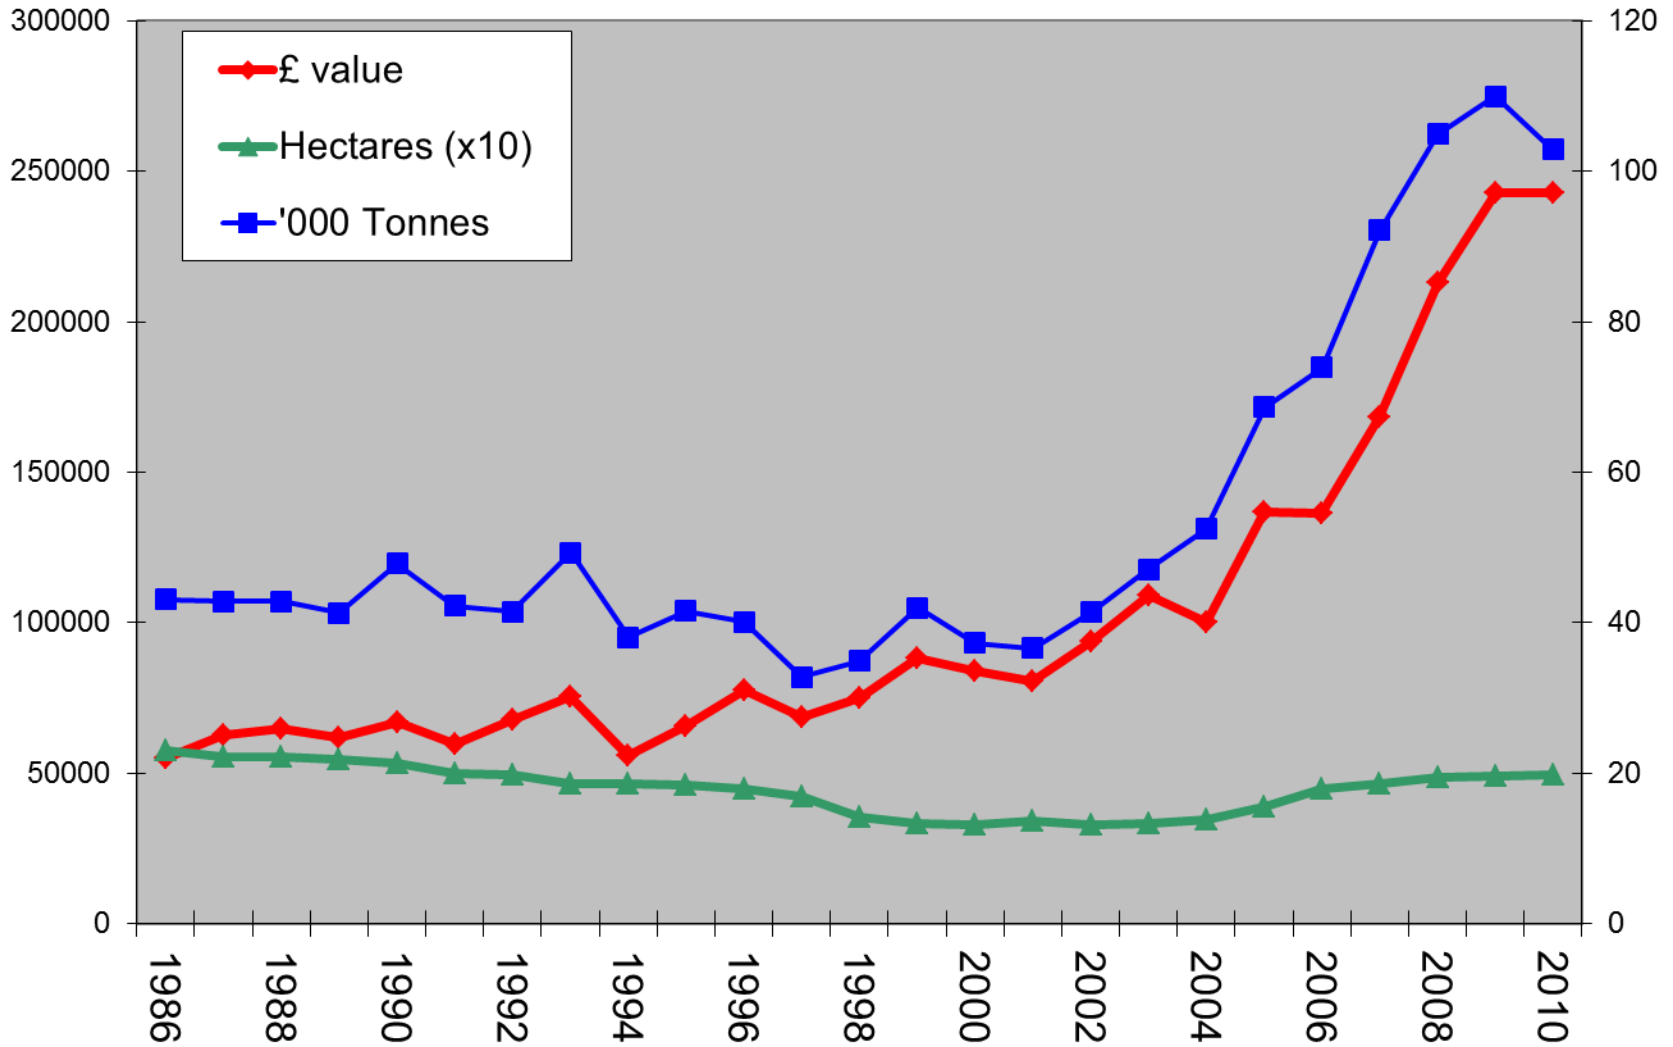

Retrofit pathway: *electric doors*

Retrofit pathway: *electric roof venting*

# UK Strawberry Statistics

# Haygrove Growing Systems

Substrate Growing Systems

## Single Gutter

Block A

6-rows per tunnel

7692 linear meters

Variety Amesti

10 plants per m

## Telescopic

Block B

8-rows per tunnel

10,256 linear meters

Variety Amesti

10 plants per m

- ✓ Six rows per tunnel
- ✓ 3m leg spacing
- ✓ Leaf & truss support every 1m or 1.5m
- ✓ Picking height as required
- ✓ End and mid drainage

# Telescopic Substrate System

- ✓ Eight rows per tunnel
- ✓ System telescopes and sits on the floor overwinter for fleecing and forcing earlier harvest
- ✓ System is lifted prior to picking
- ✓ Central net bridge for presentation of fruit between double row

**Tractor  
Spraying**

A red Haygrove Roll Forming Machine is shown in operation within a large greenhouse. The machine is processing a large roll of white material, likely polyethylene, into long, narrow strips. A person in a striped shirt is standing near the machine, and another person in a yellow shirt is visible in the distance. The greenhouse structure is visible in the background, with rows of metal frames and plastic covering. The machine is mounted on a red frame and has a yellow hydraulic arm on the right side.

Haygrove Roll  
Forming Machine

# Technical Description

<b>Steel Gutter</b>	0.65mm rolled steel gutter
<b>Gutter corrosion Protection</b>	Zinc treated pre-galvanised steel protected with different options: <ul style="list-style-type: none"><li>• Primer and white polyester finish</li><li>• Primer and Polyurethane finish</li></ul>
<b>Leg Spacing</b>	3m
<b>Working height</b>	0.9m to 1.2m depending on requirements
<b>Drainage</b>	Plastic end drainage and mid gutter drainage options available
<b>Truss and leaf support system</b>	Pre-galvanised steel leaf and truss support brackets every 1m or 1.5m depending on specification
<b>Installation</b>	Formed in the field using the Haygrove Roll Forming Machine
