

cv. 'Malling Centenary' Nutrition trial

Eamonn Kehoe and Leo Finn
Horticulture Development Department
Ashtown Research Centre

- Huge growth in the soft fruit sector over the last 20 years.
- 'Elsanta' has dominated the market for almost 40 years.
- The new cultivar 'Malling Centenary (East Malling Research) shows huge promise
- Establishing production plans for the Industry

This experiment

- Crop is grown in coir (cocoa peat)
- Planted in January in heated env.
- Nutrition for crop unclear
- Two nutrition treatments

Potential impacts

- Get better understanding of the morphology & behaviour of this short day (SD) plant
- Establish growing protocols for the growers
- Invite growers and students to visit the unit
- Diffusion of knowledge and spill over!
