

EXTENSION OF AUTHORISATION FOR MINOR USES (EAMU)

INSTRUCTIONS FOR USE

PPP: Roundup Flex (PCS No. 04593)

CROPS:

Inter-row application to outdoor grown beetroot, carrot, garlic, horseradish, leek, bulb onion, parsley root, parsnip, salad onion, salsify, shallot, swede & turnip

This approval provides for the use of the product **Roundup Flex (PCS No. 04593)** in respect of, the crops and situations as listed above, which are extra to those specified on the product label.

The conditions of application outlined below are statutory. They must be complied with when availing of this extension for minor uses.

The instructions provided in this extension for minor uses must be used in conjunction with information provided on the approved product label.

Failure to abide by the conditions of approval specified below or on the product label may constitute a breach of the product approval.

Reference Date: 24.07.2018. [Includes latest changes. This version should be used until updated]

<i>Product name:</i>	Roundup Flex
<i>Active Substance:</i>	Glyphosate
<i>Formulation:</i>	480 g/L SC
<i>Authorisation Holder:</i>	Monsanto UK Ltd
<i>Marketing Company:</i>	Monsanto Ireland Ltd
<i>PCS No:</i>	04593

There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.

User type/Function: Professional Use Only / herbicide.

Application:

Crop	Max. individual dose	Max. number of applications	Max. total dose	Minimum interval between applications	Latest time of application	Target
[Outdoor grown: beetroot, carrot, garlic, horseradish, leek, bulb onion, parsley root, parsnip, salad onion, salsify, shallot, swede & turnip]	1.125 l/ha	n/a	3.75 l/ha	21 days	28 days before harvest	Annual, perennial and biennial weeds

Other specific restrictions:

- (1) To avoid risks to human health & the environment comply with the terms of this approval in conjunction with the directions for use on the product label.
- (2) For any individual crop the maximum total dose refers to the total dose of any product containing the same active ingredient.
- (3) Application may be made via conventional hydraulic nozzle or rotary atomisers fitted with hooded and shielded nozzles, or via a spot spray hydraulic nozzle applicator used in conjunction with an automated optical weed recognition system.
- (4) Applications must be made in 80-250 litres of water per hectare (hydraulic nozzles) & 10 - 40 litres per hectare (rotary atomisers).

There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.

- (5) Applications must only be made between March and September.
- (6) Do not apply where crop foliage extends into the inter-row.
- (7) Post application, do not allow unprotected persons to enter treated areas until the crop is completely dry & has been well ventilated.
- (8) For environmental information refer to the product label.
- (9) This approval extends to professional use only.
- (10) For operator protection refer to the product label in conjunction with the specific restrictions above.
- (11) Adverse effects: Approval holders must immediately submit any new information on the potentially dangerous effects of a product or residues of an active substance contained in a product, on human or animal health, or the environment.

Advisory information:

This approval relates to the use of Roundup Flex as a horticultural herbicide for the control of annual, perennial and biennial weeds in the crops and situations listed above.

Resistance Management:

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical groups or alternative control measures should be included in the planned anti-resistance strategy. This product should be used in conjunction with other herbicides from different cross-resistant groups [different mode of action, HRAC group] with satisfactory efficacy against the target.

Roundup Flex contains glyphosate

Glyphosate is classed HRAC group: G

IMPORTANT PLEASE NOTE:

Prior to the use of this product, growers should take advice from their crop advisors particularly in relation to the use of this product within an integrated crop management system of production.

There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.
