

# NATIONAL SOIL SURVEY OF IRELAND

## Soil Drainage Map of Co. Wexford.

(To accompany Soil Survey Bulletin No.1.)

Scale: Two miles to One Inch (1:126,720)

MAP SYMBOL	DRAINAGE CLASS	DRAINAGE CHARACTERISTICS	AREA IN ACRES	% OF COUNTY
	Excessively drained.	Rapid permeability. Deep water-table.	30,220	5.22
	Freely drained.	Moderate permeability. Deep water-table.	326,265	56.35
	Poorly drained.	Slow permeability. Deep water-table.	104,670	18.10
		Moderate permeability. High water-table.	55,480	9.59
		Slow permeability. High water-table.	7,620	1.31
		Variable permeability. High water-table.	8,000	1.37
	Very poorly drained.	Slow permeability. Very high water-table.	1,570.	0.26
	Variable drainage.	Complex permeability. Iron pan in places. Deep water-table.	18,620	3.22
		Variable permeability. Deep water-table.	15,260	2.63
	Unclassified.		11,300	1.95

Distribution pattern of the soils according to natural drainage condition.
