## Management Comments

- Rainfall of 29.2mm and soil temp of 13.7°C for last week. Grazing conditions remain good & the rainfall has had no impact on grass utilisation (except during last Monday's wet day). We continue to graze the dry cows behind the milkers, aiming to be in & out in less than 3 days.
- Cows within 2-3 weeks of calving are brought to a calving paddock, where they'll be checked regularly. Their diet will be ~3kgsDm of strong stemmy grass, hay ad-lib (~6-7kgs) & 1kg of ration which carries the pre-calver minerals. After calving, their straight back to the milking herd.
- Calving is going well in the early days, 19 calved so far which is 20% of the Autumn calvers
