3. Growth rate last week was 98 kg DM/ha per day.
4. Stocking rate is 4.44 LU/ha and demand is 80 kg DM/ha per day.
5. We have a good even wedge this week. Our cover/LU is good at 189 kg DM/LU, however it is possibly a bit on the high side so we will monitor pre-grazing yields to ensure that they don't get too strong. We will probably have to take out a paddock for bales in the next week or ten days. We have 38% of the farmlet area closed for silage and topped up with 2.5 bags of CAN/acre.

- Pre-grazing yield is 1600 and we are allocating 18 kg DM of grass, no concentrate is being fed. Minerals (Mg, I, Se, Zn, Cu and Co) are being administered through the water
